My name is Bill Paisley and I am running for the position of Councillor in the by-election in November.

I moved to Hanna with my wife Marg and our children Beth, Jason & Philip in 1992 to take the position of Public Works Director with the Town of Hanna. Marg and I decided to stay in this community following my retirement 15 years ago due to the amenities and lifestyle Hanna has to offer.

I am asking for your vote in November for the following reasons:

- I have the best interests of the residents of Hanna at heart
- I feel I can contribute to the team working to maintain and build this community
- I will make fiscally responsible decisions
- I am willing to listen and learn
- I will serve the people of Hanna to the best of my abilities with integrity, honesty and fairness

My education as a civil engineering technologist from NAIT and Local Government Administrator from the University of Alberta give me a solid understanding of municipal government. My work history includes 40 years in municipal operations in 5 different municipalities. I worked in a variety of roles from labourer to administrator.

I am a strong advocate for Hanna. Building on the decisions of past Council members, I will strive to maintain the good financial position that Hanna enjoys as well as continue to maintain and improve the infrastructure that we have.

I believe the residents of Hanna can be proud of the recreation facilities we have including the well-maintained parks, arena, pool & spray park, baseball & soccer fields, tennis courts, Centennial Place, and Community Centre. These facilities, along with the Golf Course and museum, draw people to Hanna year-round. Hanna also has other key components to a healthy municipality in our Hospital and Medical Clinic, J,C, Charyk School, Lynks, RCMP detachment and a stable business community.

Having lived in Hanna for the past 34 years, I am invested in this community. Through the years, I have volunteered my time and abilities to different organizations and community groups. As I volunteer, I find that the most enjoyable part is visiting with people of this great community.
